

Capital Credits for Conservation

"Making Conservation Affordable"

Your Co-op is always on the lookout for ways we can help you make your home more energy efficient. Recognizing one of the biggest obstacles any homeowner faces when considering an energy upgrade is the initial cost, we've come up with a program to make it more affordable. It's called **Capital Credits for Conservation**. Under this program members can "cash in" their accrued Capital Credits on a discounted basis to help pay for certain conservation upgrades. Eligible upgrades include: **Geothermal Heat Pumps, Air Source Heat Pumps, Electric Thermal Storage Systems, Insulation, Windows and Solar or Heat Pump Water Heaters.**
